PROBLEM STATEMENT:

Process Software has discovered a security flaw within it's TCPware and MultiNet TCP/IP products running on OpenVMS 7.2.

All Process Software customers running OpenVMS 7.2 need to apply the security patches provided by Process Software.

Full details & Patch kits can be found on the web at

<http://www.process.com/>

and Click on the MultiNET/TCPware Advisory or by contacting Process

Software's customer support center at (800) 394-8700 or (508) 628-5074.

This problem is limited to the TCPware and MultiNet products. No action is necessary if you are running Digital's TCP/IP Services for OpenVMS, Version 5.0.

WORKAROUND:

A permanent fix has been made available by Process Software at their web site (see URL above).

OpenVMS Engineering encourages all Process Software customers to keep the sysgen parameter, ARB\_SUPPORT set to it's default value of 3 until this security patch is applied.
