

64-bit Xeon DP Workstation Board

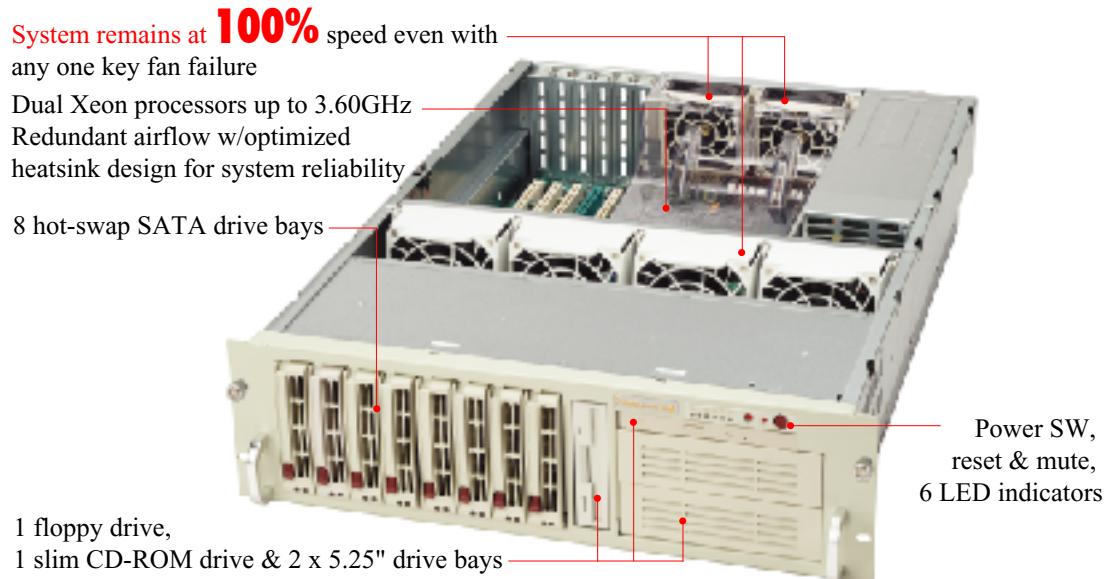

SUPERO® X6DAT-G

Powered by the Intel E7525 chipset, the X6DAT-G supports the newest dual 64-bit Xeon processors up to 3.60 GHz. It also leverages the 800MHz system bus to maximize data throughput via up to 32GB of DDR memory capacity. Combined with an optimized Supermicro workstation chassis, the X6DAT-G can enable "SuperQuiet" mode to reduce its noise level to as low as an inaudible 30dB. This workstation-oriented board also supports the latest Scalable Link Interface (SLI) technology that takes advantage of dual PCI-Express x16 graphics cards bandwidth for amazing graphics performance. Dual gigabit Ethernet and IPMI 2.0 provide scalable, high-bandwidth networking and advanced system management, while the new 6-port SATA controller supplies outstanding storage capacity. The versatile X6DAT-G is an excellent choice for video server or high-end workstation solutions that is suitable for a wide range of business-critical and database applications.

64-bit DP Xeon SATA Serverboard

SUPER[●] X6DHT-G

SUPER[●] SC833T-R760

SUPER[●] X6DHT-G

The SUPER X6DHT-G serverboard incorporates leading-edge server technologies into a cost-effective SATA solution. A feature-rich design that provides outstanding performance and versatility, the SATA-integrated X6DHT-G is optimized for both high-end server and storage platforms. Based on Intel's E7520 chipset, the X6DHT-G supports 64-bit Xeon processors up to 3.60GHz with an 800MHz FSB. Its high-performance Marvell SATA controller supports up to eight SATA drives with optional RAID functionalities. Performance is maximized via eight DDR slots that support up to 32GB of memory, while the IPMI 2.0 option delivers excellent system management and control. Multiple PCI-Express slots and dual Gigabit LAN ports are included to handle hi-speed expansion and connectivity. The X6DHT-G is ideal for front-end servers in mid-sized companies and large enterprises.

* SDDC: Single Device Data Correction

**TM2: Thermal Monitoring

800FSB DP 64-bit Xeon Board

Workstation/Server

SUPER● X6DAL-TB2

This mainstream workstation/server solution is based on Intel's E7525 chipset. This X6DAL-TB2 maximizes data throughput with its dual Xeon processors and 800MHz system bus speed. The PCI-Express x16 expansion slot is ideal for intensive graphics applications, movie rendering and other engineering applications that require a great deal of I/O bandwidth. Combined with the SC733i-645 chassis, a generous 645W power supply with Pulse Width Modulated (PWM) fan speed control ensures sufficient power and ultra-quiet operation in any environment. Optimizing the price/performance ratio, the X6DAL-TB2 utilizes Serial ATA hard drives with optional RAID 5 to achieve excellent storage performance and reliability at a reasonably low cost. Many other great features packed in this ATX powerhouse include two 64-bit PCI-X 66MHz expansion slots, up to 12GB of ECC registered DDR2 SDRAM support and dual PCI-Express Gigabit Ethernet ports.

Key Features:

- ✓ Dual Intel Xeon processors up to 3.60GHz
- ✓ Intel E7525 chipset
- ✓ 800MHz system bus
- ✓ 12GB ECC Reg. DDRII 400 SDRAM
- ✓ 1 PCI Express x16
- ✓ 2 PCI-X 66MHz & 2 PCI
- ✓ SATA controller supports 6 SATA connectors
- ✓ AOC-LPZCR1 or AOC-2020SA support
- ✓ Dual PCI-Express Gigabit Ethernet ports
- ✓ Up to 4 USB 2.0 ports
- ✓ TM2 & CPU thermal trip support for processor protection

Cost-effective Serverboard

SUPER● X6DVL-EG2

Powered by the Intel E7320 chipset, the X6DVL-EG2 serverboard supports the latest dual 64-bit Xeon processors up to 3.60GHz in a very cost-effective standard ATX form factor. It also leverages the 800MHz system bus to maximize data throughput via DDR2 memory technology. This entry-level serverboard also supports two PCI-Express x4 cards and four legacy PCI cards. Dual Gigabit Ethernet and IPMI 2.0 provide scalable, high-bandwidth networking and advanced system management. The X6DVL-EG2 is an excellent choice for entry-level server solution, and for budget-minded companies who want to leverage its high-end server features such as PCI-Express and DDR2 technology.

Key Features:

- ✓ Dual Intel Xeon processors up to 3.60GHz
- ✓ Intel E7320 chipset
- ✓ 800 MHz system bus
- ✓ 8GB ECC Reg. DDRII 400 SDRAM
- ✓ 2 PCI Express x4 (using x8 slot)
- ✓ 1 PCI 66MHz & 3 PCI
- ✓ ATI Rage XL 8MB PCI graphics
- ✓ Up to 4 USB 2.0 ports
- ✓ Dual Gigabit Ethernet ports
- ✓ TM2 & CPU thermal trip support for processor protection
