

Mission Critical Server Solutions

2U Twin²™ • GPU Solutions • 2.5" HDD Solutions • 93%+ Power-Efficiency

Universal I/O (UIO) Server

- Up to 2/6 Add-on Cards for 1U/2U
- Flexible I/O Configurations
- Optional SAS RAID, 10GbE, and InfiniBand
- Gold Level High-Efficiency Power Supply

2U Twin SuperServer

- 6 x 3.5" HDDs Per Node & Per 1U
- 2 PCI-2.0 FH/FL cards or 1 double-width GPU
- Cable-less Hot-swappable Nodes
- Gold Level High-Efficiency (93%+) Power Supply

GPU Supercomputing Solutions

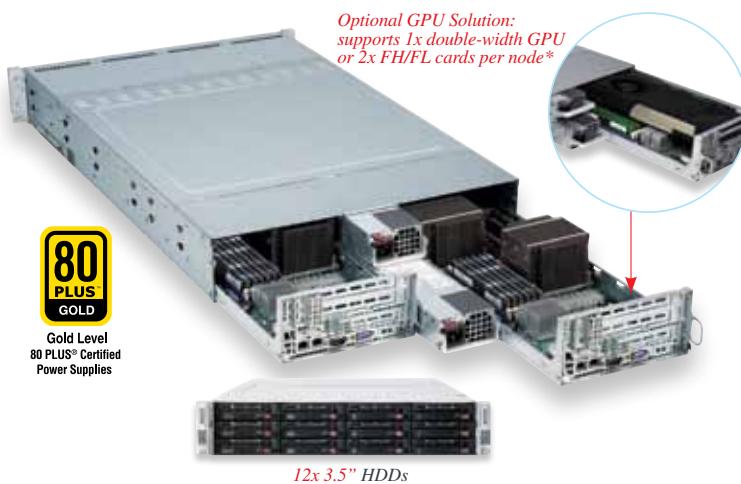

- High Performing, Heterogeneous CPU+GPU Computing
- 2x 1 TFLOP GPUs in 1U, or
- 4x GPUs or 11x Expansion Slots in 4U
- Gold Level High-Efficiency Power Supply

Twin Family

Unrivaled Efficiency and Performance · Cost-Effective with High Reliability/Density

2U Twin

6x 3.5" HDDs Per Node & Per 1U

2U Twin²

Four DP Nodes in 2U

- Two hot-pluggable, cable-less Intel® Xeon® processor 5500 series DP nodes
- Two sets of up to 96GB Reg. ECC DDR3 in 12 DIMMs
- Two sets of 2 PCI-E 2.0 FH/FL cards or 1 double-width GPU
- Two sets of up to 6 hot-swap 3.5" SATA HDDs
- Two ConnectX DDR or QDR InfiniBand controllers
- Two sets of dual Gigabit Ethernet LAN ports
- Two BMC supporting IPMI 2.0, virtual media/KVM over LAN
- Redundant high-efficiency Gold Level (93%+) 1400W power supplies
- Power-efficient serverboard and cooling subsystems

- Four independent hot-pluggable, cable-less Intel® Xeon® processor 5500 series DP nodes
- Four sets of up to 96GB Reg. ECC DDR3 in 12 DIMMs
- Four sets of PCI-E 2.0 x16 slots
- Four sets of 3 hot-swap 3.5" SATA HDDs (6026TT) or 6 hot-swap 2.5" SATA HDDs (2026TT)
- Four ConnectX DDR or QDR InfiniBand controllers
- Four sets of dual Gigabit Ethernet LAN ports
- Four BMC supporting IPMI 2.0, virtual media/KVM over LAN
- High-efficiency Gold Level (93%+) 1400W power supply with optional 1+1 redundancy
- Power-efficient serverboard and cooling subsystems

The Supermicro Twin Family is truly revolutionary. With four DP nodes in a 2U space, the **2U Twin²** delivers world-class performance and energy efficiency in a small but powerful package. The new **2U Twin** with two hot-swap motherboard modules in 2U supports two PCI-E 2.0 FH/HL add-on cards per node. This newest addition to the Twin Family can optionally support 1 double-width GPU card per node, and provides 6x hot-swap 3.5" SAS/SATA HDD bays with SESII support per 1U server node (12x HDDs total). Optimized redundant Gold Level power and cooling make the **2U Twin** and **2U Twin²** the best choices for HPC, datacenter, and cost-effective blade applications. Together with the award-winning **1U Twin™** systems, Supermicro continues its Twin technology and offers the most advanced and complete HPC solutions in the world.

* GPU solution for OEM customers only: 6026GT-HTRF / -HIBXRF / -HIBQRF

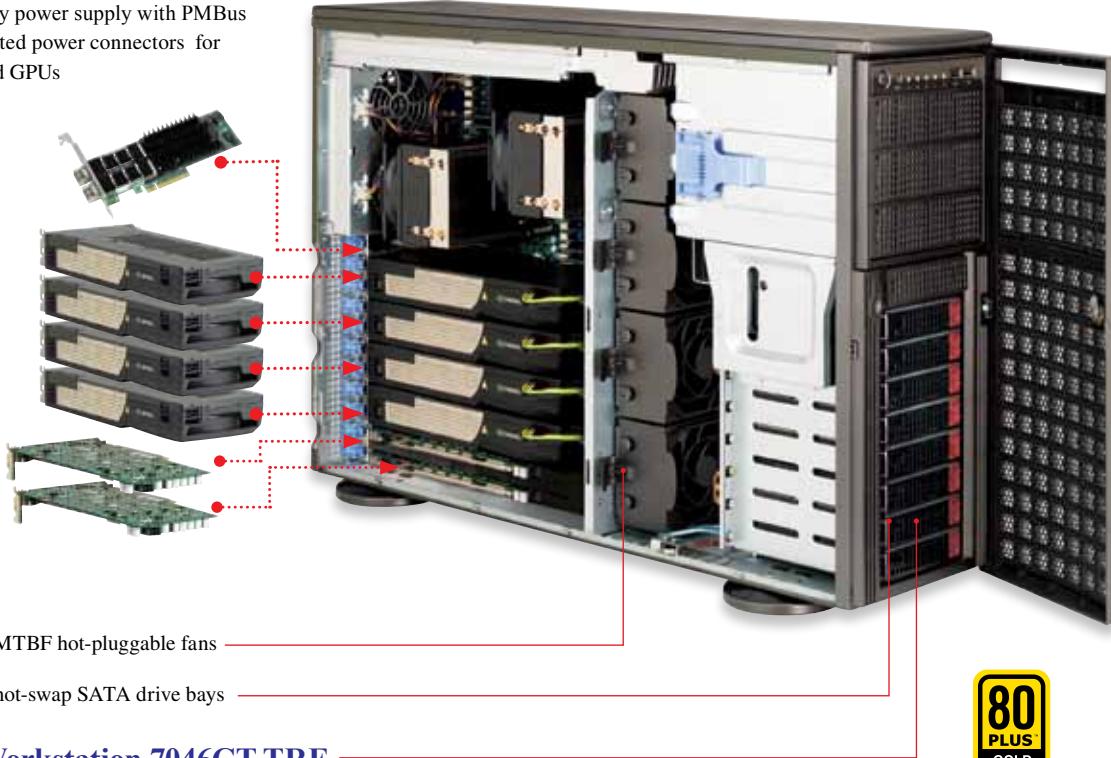

GPU

Massively Parallel Processing

Maximized 4U Expandability, Featuring 11 Expansion Slots

- Up to 4 GPUs or 11 PCI-E Full-Height Full-Length Expansion Slots

- 1400W redundant Gold Level high-efficiency power supply with PMBus
- 4 Dedicated power connectors for high-end GPUs

Supermicro GPU Supercomputing Server Solutions

The SS6016T-GF, SW7046T-GRF, and SW7046A-HR+ supercomputing server solutions establish Supermicro as the true global IT hardware leader in server architecture, performance, and Green computing. Generating massively parallel processing power and unrivaled networking flexibility with 4x double-width GPUs and 11x expansion slots in a 4U form factor, the SW7046T-GRF is performance and quality optimized for the most computationally-intensive applications. The SS6016T series, with the industry's highest heterogeneous computing density supporting 2x double-width GPUs in a 1U form factor, is the world's first and only GPU optimized 1U server.

NEW GENERATION UP

Higher Performance, Better Efficiency

• LSI 2008 8-port **6Gb/s SAS**

- Dual LAN with Intel® 82574L Gigabit Ethernet
- Matrox G200eW Graphics
- IPMI 2.0 + KVM with dedicated LAN

- Intel® Xeon® Processor 3400 series supported
- Up to 16GB/32GB Unb. Reg. ECC DDR3 1333/1066/800 SDRAM in 6 DIMMs
- Intel® 3420 chipset

SuperServer 1016I-M6F
X8SI6-F Serverboard + SC113MTQ-560 Chassis

New-Generation UP Server Building Block Solutions®

Supermicro's new-generation UP server and desktop systems offer all the advantages of Supermicro's advanced motherboard designs. In addition, leading-edge system-level features are supported including 2.5" and 3.5" HDDs with RAID support, Gold Level high-efficiency power supplies, and optimized cooling systems. Special features include short-depth chassis, tool-less cost-optimized chassis designs, and Whisper-Quiet 25 dB operation. Supermicro's flexible Server Building Block Solutions® makes this the most complete line of advanced UP systems in the industry.

UIO

Universal I/O

**Up to 3 Add-on Cards for 1U
Maximized I/O Expandability
& Flexibility**

**More than 20 choices: SAS2 RAID, 10GbE, InfiniBand, UIO Cards . . .
The freedom to build exactly what you need!**

Supermicro UIO Servers, in combination with riser cards and a UIO card, can provide numerous server configurations to accommodate the specific needs of your application. Our various riser cards for 1U and 2U chassis allow you to customize Supermicro UIO solutions to meet your storage and networking requirements. With a Supermicro UIO solution, you can customize high-performance, high-density and fault-tolerant storage solutions with Supermicro UIO SAS RAID card products. Leveraging a variety of UIO Gigabit Ethernet Adapters, the UIO system improves network throughput as well as application performance. All Supermicro UIO solutions can be utilized without occupying existing PCI slots, leaving those slots free for additional expansion cards.
